AN INNOVATIVE FEDERAL APPROACH TO HEALTH CARE

ADDRESS THE TRUE COSTS OF HEALTH RESEARCH

To help drive Canada’s competitiveness in the global economy, health researchers need to be supported for the full costs of research. Canada’s Research Support Fund helps researchers cover indirect research costs, such as for maintaining modern labs and equipment, hiring administrative support, and paying other administrative expenses.

Over time the support provided by this fund has eroded. Canadian researchers are at a severe competitive disadvantage relative to our peers.

How can you help?

Support Canadian researchers by establishing a minimum floor of 25% funding from the Research Support Fund to cover the indirect costs of research.

For more details on HealthCareCAN’s recommendations for transforming Canada’s healthcare system, see our 2019 Pre-Budget submission at www.healthcarecan.ca or contact us at 713-241-8005 x 205
WHO WE ARE
HealthCareCAN is the national voice of Canada’s healthcare organizations, community and research hospitals across Canada. We represent over 600,000 employees, 8,000 scientists, 60,000 research staff and students, and 45,000 volunteers in the healthcare setting.

RENEW COMMITMENT TO HEALTHCARE INFRASTRUCTURE
The federal government used to play a key role in building and maintaining healthcare infrastructure. But for the last decade, Canadian hospitals and healthcare institutions have been excluded from federal infrastructure funding, even as they have been transforming to meet the evolving needs of patients.

If Canada is to continue providing safe, innovative, high-quality healthcare for its citizens, we must update and upgrade our aging hospital infrastructure.

How can you help?
Allow healthcare organizations to apply directly for federal infrastructure, innovation, and research funding support, per FINA’s recommendation in 2017.

Hazard of aging health infrastructure
- Weakened Disaster Responsiveness
  - Decreased ability to respond to disasters (e.g. extreme weather)
- Risks to Patient Safety
  - Increased probability of accidents or hazards (e.g. hospital-acquired infections)
- Costs to the Environment
  - Inability to deploy clean energy solutions

UNLOCK THE POWER OF DIGITAL HEALTH
The future of Canada’s healthcare system depends on our ability as a nation to seize the possibilities presented by digital health. The healthcare community needs stimulus funding to drive growth in the development and adoption of digital technologies in health.

How can you help?
Invest $100 million over five years through Canada’s hospitals to help clinicians and patients develop, evaluate, and deploy innovative digital health platforms.

Benefits of investing in digital health
- Cost savings
  - Better use of data and analytics could save the health system $10 billion a year
- Increased productivity
  - Digital health systems could act as a catalyst, boosting productivity by up to $408 million
- Improved health
  - Treatments have been radically improved as a result of adopting digital technologies
